

## Team Lead - Natural Language Processing (NLP) (m/f/d)

### About us

parlamind is developing the future of intelligent communication. With the use of artificial intelligence we help companies successfully process the whole spectrum of communication and operations. For this purpose, our international team of software specialists and linguists is developing a business-communication solution based on machine learning and natural language processing which analyses, understands, and automatically processes incoming requests. We are part of a group of German technology companies driven by innovation.

### About the team

The NLP team is of utmost importance for the company's success. Together, they develop the core of our software solution : AI driven components for speech comprehension and dialogue management. Our excellent team of computational linguists, linguists and software engineers is researching and implementing modules in the areas of Natural Language Understanding, Machine Learning and Dialogue Systems at the interface between language and software development. The work within the NLP team is based on the current state-of-the-art of machine learning and language technology and brings the latest and best approaches directly to our customers.

### What you will achieve at parlamind

As Team Lead NLP you report directly to the management. You are responsible for the NLP and AI components as your products and together with your team you make sure to develop successful, innovative solutions.

- You lead your team in a professional manner and are available for any questions and challenges
- You manage the product backlog, set goals, plan sprints and lead the team through the bi-weekly iterations and corresponding meetings
- You plan the strategic further development of the NLP components together with our management
- With your team you develop concepts for the development, evaluation, and integration of NLP components for the automation of dialogues in speech-, email-, and chat communication
- You strengthen your team with team building measures
- You contribute to the planning and publishing of research work and papers
- You stay up to date with the latest developments in the NLP field

### Key Skills and Experience

- At least 4 years experience as a Team Lead
- Professional experience in **java and python** development
- You are familiar with Natural Language Processing and Machine Learning
- You speak fluent English and German
- Master or PhD. level

## Who you are

- You are a motivated, exceptionally reliable and detail oriented person
- You are eager to participate and actively help shape our products for success
- You have excellent communication skills and are an equally good listener

## What's in store for you

- We offer you a diverse, exciting job with a high level of responsibility
- You will find a bright work space in the heart of Berlin Kreuzberg
- You get a chance to actively shape our innovative technologies and bring them to the next level
- You will be part of a motivated, international team with flat hierarchies and eye-level communication
- You will be able to define and develop your own profile within the Berlin based A.I. community by actively participating in conferences and events
- We offer a lot of room for creativity and realisation of your ideas and projects
- Fun company- and team events
- We offer an Urban Sports Club membership at a discount
