

Working Student Software Development (m/f/d)

About us

parlamind is developing the future of intelligent communication. With the use of artificial intelligence we help companies successfully process the whole spectrum of communication and operations. For this purpose, our international team of software specialists and linguists is developing a business-communication solution based on machine learning and natural language processing. We are part of a group of German technology companies driven by innovation.

About the team

As part of our Development Team you develop modern and innovative software that is the foundation of our products. You help to implement the results of our research in the areas of Natural Language Understanding, Learning, Clustering, and Dialog Systems into usable software. Our work is based on the current state-of-the-art for containerized, scalable software architectures. Together, we deliver cutting-edge technologies to our customers.

What you do at parlamind

- You are part of our agile development team and contribute to our innovative technology stack (mainly Java, JavaEE)
- Develop, and test new components in our software systems
- Get involved and actively contribute to the implementation of our solutions

Who you are

- An actively enrolled student in Computer Science or related field of study
- Ideally you have some experiences with Java
- You are motivated, reliable, detail oriented, and eager to participate in the development of our products
- You value active teamwork

What's in store for you

- A varied, exciting job with a high degree of individual responsibility
- You will be able to actively shape our innovative technologies
- You will be part of a motivated, international team with flat hierarchies and communication at eye level
- Space for creativity and realisation of your ideas and projects
- a great workplace in Berlin Kreuzberg

Further Information

- Location Berlin
- Start at the next possible date
